TECHNICAL BULLETIN

EU PPWR COMPLIANCE STATEMENT

APPLICABLE TO MOLDED POLYSTYRENE PRODUCTS

Atlas Molded Products is committed to sustainability and providing transparent information to users of our products.

The EU Packaging and Packaging Waste Regulation (PPWR), Regulation (EU) 2025/40, is the European Union's comprehensive packaging law designed to reduce packaging waste, increase recyclability, expand reuse systems, and drive circular economy goals. It entered into force on February 11, 2025, and generally applies beginning August 12, 2026. Individual requirements under the PPWR may have different application dates.

This PPWR Substance Compliance Statement is being provided to demonstrate compliance of molded polystyrene foam produced by Atlas Molded Products with the substance requirements of the PPWR. Under the PPWR, all packaging placed on the EU market must be manufactured so that the presence and concentration of substances of concern are minimized to reduce impacts on human health, recycling, and the circular economy.

Per- and polyfluoroalkyl (PFAS) substances are considered substances of concern under the PPWR with respect to food-contact packaging. Atlas Molded Products does not intentionally add PFAS substances to its molded polystyrene foam products and is not aware of the presence of these substances at levels that would exceed the PPWR limits.

Heavy metals are substances of concern under the PPWR where the sum concentration of lead, cadmium, mercury, and hexavalent chromium must not exceed 100 parts per million (ppm) by weight. Atlas Molded Products does not intentionally use or add these heavy metals to its molded polystyrene foam products and is not aware of their presence at levels that would exceed the PPWR limits.

This statement is based on information provided by raw material suppliers and Atlas Molded Products' current knowledge of product composition as of the date of issuance.
