WINE SHIPPERS **THAT WORK WITH NATURE.**

UNIVERSAL STANDUP | UNIVERSAL STANDUP KITS | MAGNUM

OUR WINE SHIPPERS ARE BETTER FOR THE ENVIRONMENT.

Getting wine from vineyard or retailer to table can be a challenge, but with our Biodegradable Technology (BDT) packaging, it's more landfill friendly. If you've already been shipping with foam wine shippers, don't change what's been working for years. Instead, demand a polystyrene foam shipper that's better aligned with your sustainability practices. If you're new to wine shipping, or just implementing sustainability practices, BDT can align perfectly with your needs with its best in class temperature control performance.

RECYCLABLE

The advanced technology being used in our BDT foam shippers has absolutely no negative impact on its ability to be recycled. It can be recycled anywhere that accepts standard #6 recycling. In fact, there are over five hundred locations nationwide that accept it, including all of our manufacturing locations. When recycling our DuraTherm® BDT packaging into new packaging solutions, we are reducing the impact on our planet significantly when compared to sourcing new materials. Our BDT formula can be perpetually recycled into other polystyrene products and foam packaging for years to come.

LANDFILL FRIENDLY

Not able to recycle? This is where our new Biodegradable Technology helps the environment more efficiently than ever. DuraTherm BDT insulated shippers are formulated to break down more quickly in biologically active landfills than other polystyrene foam. The advanced EPS used in DuraTherm BDT packaging biodegrades 92% over four years using the ASTM D5511 test that simulates wetter and biologically active landfills*. This technology allows landfill microorganisms to break down the material into organic matter, water, and carbon dioxide, which can be safely and naturally assimilated into the environment. So while recycling is always preferred, when material makes it way to a landfill, biodegradation helps save precious landfill space.

**INFINITELY
RECYCLABLE**

**TEMPERATURE CONTROL
FOR SHIPPING WINE**

**CAN BIODEGRADE 92%
IN WETTER LANDFILLS***

*The EPS used in DuraTherm BDT Sustainable Packaging has been shown to biodegrade 92% over 4 years under conditions that simulate both wetter and biologically active landfills using ASTM D5511 test. While 80% of landfills are wetter or biologically active, they may not exist in your area. The stated rate and extent of degradation do not mean the product will continue to degrade.

DuraTherm BDT Wine Shippers offer **best in class temperature control** during wine shipments, whether it's summer or winter. Securing the bottles in place happens with an innovative tightening system that minimizes movement. For overall peace of mind, improved bottom cushioning with robust chamfered edges and increased wall thicknesses provide the highest level of tested protection in the market.

DuraTherm BDT Universal Wine Shippers

Our Universal Wine Shippers are designed to fit most 750 ml wine bottles with a diameter up to 3-7/8". Universal Wine Shippers are available in 1, 2, 3, 4, 6, and 12-pack configurations.

The 6 and 12-pack Universal Wine Shippers utilize specially designed pockets that hold frozen gel refrigerants and provide internal airflow for additional protection to your wine during transit. The 6-pack Universal Wine Shippers contain one gel refrigerant cavity and 12-pack Universal Wine Shippers contain two gel refrigerant cavities.

DuraTherm BDT Magnum Wine Shippers

Our Magnum Wine Shippers are designed to fit most 1.5L bottles. The Magnum Wine Shippers are available in a 3-pack configuration which can be easily separated to create a 1 or 2-pack configuration.

DuraTherm BDT Universal Wine Shipper Kits

Atlas Molded Products provides single-source Wine Shipper Kits. Each kit consists of a Universal Wine Shipper paired with a corrugated box. Select DuraTherm BDT Wine Shipper Kits have been tested to meet ISTA Standards.

State Law Notice: Some state laws (CA/CO/MD/MN/WA) prohibit the sale of plastic products that are labeled with the term 'biodegradable' or imply in any way they will biodegrade in a landfill. Unfortunately, these state laws provide no option to demonstrate biodegradability following accepted ASTM standards. For sales in or into any jurisdiction which prohibits such claim by law, rule, or regulation, Atlas Roofing Corporation makes no claims that these products will break down, biodegrade, or decompose in a landfill or any other environment.
