

SUSTAINABILITY AT ATLAS MOLDED PRODUCTS

OUR SUSTAINABILITY PROMISE EMBODIES A COMMITMENT TO BIG CHANGE THROUGH CONTINUOUS SMALL IMPROVEMENTS

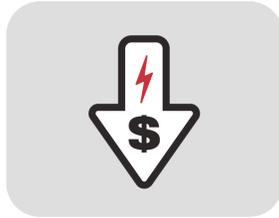

OUR PRODUCTS

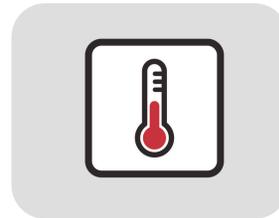

EPS products are 100% recyclable!

Use of lightweight materials reduces environmental impact.

Our insulation products reduce energy use, therefore reducing fossil fuel consumption.

The protection of goods and temperature-sensitive shipments ensures product quality and reduces waste.

We accept EPS at all our locations for recycling to divert from landfills!

Our products offer protection and insulation with a lower environmental impact than alternative materials in LCAs.

OUR PLANET

Our products are manufactured with low Global Warming Potential (GWP)!

Manufactured with zero Ozone Depletion Potential (ODP) blowing agents. No CFCs, HFCs, HFOs or HCFC's are used!

Material not reincorporated is used as post-industrial recycled content in other polystyrene products.

OUR PEOPLE

Our safety program prioritizes the well-being of employees, visitors, and consumers.

Atlas invests to support the success and safety of our communities, customers, and suppliers.

Our employees are our greatest asset. We invest in their training & development.
