

GREENGUARD RECOGNITION

APPLICABLE TO DURATHERM®, ELEVATION® AND THERMALSTAR® PRODUCTS

Atlas Molded Products is committed to sustainability and providing transparent information to users of our products. We have GREENGUARD Certification to demonstrate our commitment to sustainability and healthy indoor environments.

Indoor air is often 2-5 times more polluted than outdoor air due to emissions of high levels of Volatile Organic Compounds (VOCs) from some products. This can lead to health problems such as allergies, headaches, and asthma. We worked with industry leading UL Solutions and their UL GREENGUARD Certification program to show compliance with chemical emission standards and our commitment to healthier indoor environments. [LEARN MORE.](#)

Our Atlas molded polystyrene products have been rigorously tested for thousands of chemicals and we are pleased that we offer GREENGUARD GOLD Certified products. GREENGUARD GOLD Certified products are low emitting and emit fewer chemicals.
