

EXTERIOR UV EXPOSURE PRIOR TO CLADDING

APPLICABLE TO THERMALSTAR® E+, X+ AND G+

ThermalStar® E+, X+ and G+ have durable dual film facers which serve as a code compliant water resistive barrier (WRB) and is a component of an air barrier system when properly flashed and taped.

ThermalStar E+, X+ and G+ products should be promptly sealed with tape and flashing upon installation.

ThermalStar E+, X+ and G+ should be covered with cladding material within 90 days of installation.
