

# Wine Shippers

Closing the loop. Opening the future.

## Insulate & Protect

Getting temperature sensitive assets from one place to another can be a challenge, but with DuraTherm® Wine Shippers it's a breeze. Experienced wine shippers have been using our DuraTherm Wine Shippers for decades.

As the need for more sustainable solutions has grown, we exclusively manufacture DuraTherm Wine Shippers with ReGenX™ PCR technology.

DuraTherm Wine Shippers offer best in class temperature control for wine shipments, whether it's summer or winter. Securing the bottles in place happens with an innovative tightening system that minimizes movement. For overall peace of mind, DuraTherm Wine Shippers feature improved bottom cushioning with robust chamfered edges and increased wall thicknesses to provide the highest level of tested protection in the market.

## Wine Shippers with ReGenX PCR are Better for the Environment

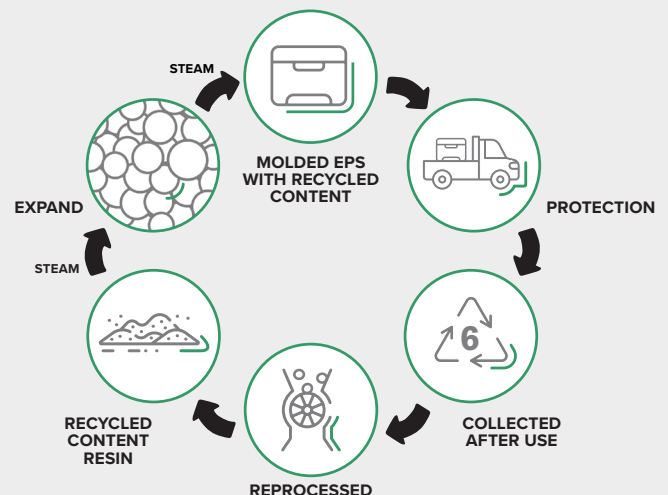

The world's resources are limited, but our potential for innovation isn't. That's why Atlas uses **ReGenX Technology** – a material that transforms used products into high-performance recycled content, closing the loop on waste and unlocking a better, more sustainable tomorrow.

### How ReGenX Works

Our process gives materials a second life without compromising performance or quality:

- We collect EPS that is end of life
- Collected materials are reprocessed into a recycled content resin
- We expand and mold the material
- DuraTherm with ReGenX is used again!

## Benefits of Choosing Products made with ReGenX™ PCR Technology

- **Supports a circular economy** – Contains up to 50% post-consumer recycled (PCR) content, reducing reliance on virgin materials
- **Delivers the same trusted performance** – No compromise on strength, durability or reliability
- **No added cost** – Sustainable material at the same price point.
- **Quality** – Meets or exceeds industry standards and performance benchmarks
- **Reduces environmental impact** – Helps cut greenhouse gas emissions and landfill waste

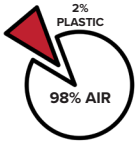

## Product Sustainability

In addition to ReGenX technology, all of our DuraTherm products are inherently sustainable.

**Recyclable.** Recycle your used DuraTherm and other EPS products at over 700 facilities nationwide.

**98% air.** DuraTherm products only use 2% raw material, the rest is air.

**Low GWP. Zero ODP.** Not produced with harmful blowing agents.

**Locations nationwide.** Reduce your carbon footprint by shipping the shortest distance possible.

## Universal Wine Shippers

Our Universal Wine Shippers are designed to fit most 750 ml wine bottles with a diameter up to 3 7/8".

### 6-pack and 12-pack

The 6 and 12-pack Universal Wine Shippers utilize specially designed pockets that hold frozen gel refrigerants and provide internal cooling for additional protection to your wine during transit. The 6-pack Universal Wine Shippers contain one gel refrigerant cavity and 12-pack Universal Wine Shippers contain two gel refrigerant cavities.

### 1-pack, 2-pack, and 4-pack

The 4-pack Universal Wine Shipper is designed for shipment of 4 wine bottles and can be easily separated to create a 1 or 2-pack configuration.

## Magnum Wine Shippers

Our Magnum Wine Shippers are designed to fit most 1.5 L bottles. The Magnum Wine Shippers are available in a 3-pack configuration which can be easily separated to create a 1 or 2-pack configuration.
