

Insulated Shippers

Closing the loop. Opening the future.

Insulate & Protect

Getting temperature sensitive assets from one place to the other can be a challenge, but with DuraTherm® insulated shippers it's a breeze. Experienced cold chain shippers have been using our DuraTherm

insulated shippers for decades. As the need for more sustainable solutions has grown we exclusively manufacture DuraTherm with ReGenX™ technology.

Cold Chain Applications

- Life Sciences
- Pharmaceuticals
- Frozen & Fresh Food
- Any Temperature Sensitive Shipment

Insulated Shippers with ReGenX are Better for the Environment

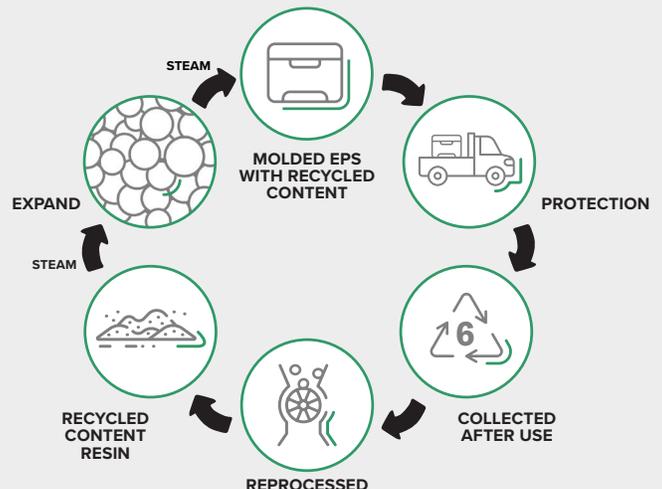

The world's resources are limited—but our potential for innovation isn't. That's why Atlas uses **ReGenX Technology** – a material that transforms used products into high-performance recycled content, closing the loop on waste and unlocking a better, more sustainable tomorrow.

How ReGenX Works

Our process gives materials a second life without compromising performance or quality:

- We collect EPS that is end of life
- Collected materials are reprocessed into a recycled content resin
- We expand and mold the material
- DuraTherm with ReGenX is used again!

Benefits of Choosing Products made with ReGenX™ Technology

- **Supports a circular economy** – Contains up to 50% recycled content, reducing reliance on virgin materials
- **Delivers the same trusted performance** – No compromise on strength, durability or reliability
- **No added cost** – Sustainable material at the same price point.
- **Quality** – Meets or exceeds industry standards and performance benchmarks
- **Reduces environmental impact** – Helps cut greenhouse gas emissions and landfill waste

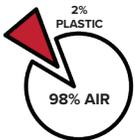

Product Sustainability

In addition to ReGenX technology, all of our DuraTherm products are inherently sustainable.

Infinitely recyclable. Recycle your used DuraTherm and other EPS products at over 700 facilities nationwide.

98% air. DuraTherm products only use 2% raw material, the rest is air.

Low GWP. Zero ODP. Not produced with harmful blowing agents.

Locations nationwide. Reduce your carbon footprint by shipping the shortest distance possible.

Standard and Custom Options

DuraTherm insulated shippers come in a variety of standard sizes that work perfectly for everything ranging from small vials of life-saving medicines to much larger needs, like getting weekly meal kits or meat deliveries to the end user.

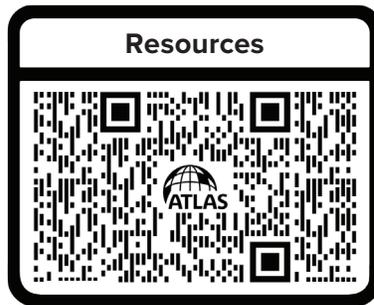

Choose from a wide range of DuraTherm insulated shipper sizes, ranging from 8”L x 6”W x 3”H to 24”L x 17”W x 14”H.

If your needs don’t align with a standard size, we will work with you to create a custom solution for you.

Kitted DuraTherm

A full range of coolers paired with outer corrugated boxes is available, making it even easier for shippers to be efficient.
